## Projects

### Game Store

Web application built using ASP.NET Core and Razor Pages. It uses Entity Framework with MS SQL Server for the database. This project is a game store that allows accounts to be registered, games to be "purchased" and more.

### Personal Website

Web application built using React. This website is used to display my skills and to present a portfolio of projects. It was also used to teach myself React and to improve on responsive design.

### Gulp Boilerplate

A very simple boilerplate that will be used to start any front-end projects. Minifies css/js, converts scss to css, auto prefixes css and more.
