Projects

Game Store

Web application built using ASP.NET Core and Razor Pages. It uses Entity Framework with MS SQL Server for the database. This project is a game store that allows accounts to be registered, games to be "purchased" and more.

Personal Website

Web application built using React. This website is used to display my skills and to present a portfolio of projects. It was also used to teach myself React and to improve on responsive design.

Gulp Boilerplate

A very simple boilerplate that will be used to start any front-end projects. Minifies css/js, converts scss to css, auto prefixes css and more.
